Unlock bootloader?

If you unlock the bootloader, you will be able to install custom operating system software on this phone.

A custom OS is not subject to the same testing as the original OS, and can cause your phone and installed applications to stop working properly.

To prevent unauthorized access to your personal data, unlocking the bootloader will also delete all personal data your phone (a "factory data reset").

Press the Volume Up/Down buttons to select Yes or No. Then press the Power button to continue.

Yes

Unlock bootloader (may void warranty)

No

Do not unlock bootloader and restart phone
